If you want quality and resale value choose a Motostar Toy Hauler, you will not be disappointed!

OUR STORY:

Motostar Trailers may be a small business but our trailers pack a mean punch. Every motorcycle enthusiast needs a sturdy, reliable and secure motorcycle trailer built to withstand the elements and specifically suit their individual needs. We will design and build a trailer to fit your bikes perfectly and meet any further specifications you may have in mind. None of this hand cut nonsense, we know machine cut trailers come up trumps so we exclusively use this method. Line cut steel & CNC routed components ensure our trailers are manufactured to the millimeter every time. Camping as well? No problem, we can build the trailer and camper into one. In the world of enclosed motorcycle trailers, there's not much we can't do.

FINANCE:

With our partner Blink Finance

Thinking about purchasing that Motostar Trailer you've always wanted? Our partner Blink Finance has Australia's leading Finance products to get you the cheapest trailer loan rates available. Whatever your situation may be, their comprehensive range of low interest finance options means you can find the ideal package that fits your budget and meets your needs.

Want to know more before you apply online? Simply call Blink Finance on 1300 827 848 and talk to one of their friendly finance specialists about any or concerns you might have.

FREIGHT:

With our partner Openica Logistics

We can arrange to freight your trailer Australia wide with the confidence your purchase will arrive with no damage. Openica logistics have depots in most states & provide a professional & reliable service. Alternatively we are happy for our customers to obtain there own freight company.

There are many online tender companies like Load shift or Freight Seek to obtain competitive quotes

WARRANTY:

Motostar Trailers are a registered trailer manufacturer. We build to the national code of practice and back our workmanship, materials & parts with a 12 month manufacturers warranty on our trailers

PAYMENT TERMS:

10% on order, 40% 6 weeks prior to start, 50% prior to pick up by electronic transfer

The advantages of choosing a Motostar Toy Hauler

The exterior:

Motostar have been using Ullrich Aluminium Composite Panel for the exterior and interior cladding for many years.

The product has proven to be both durable and strong. All components for the build are CNC routed for the fitting and assembly process of our toy haulers.

Motostar chassis & frame

Fully welded one piece chassis & sub frame for extra strength and longevity. Fabricated from Orrcon Duragal line cut steel for precision cutting every time. All welds are prepped, primed and coated in a galvanised spray.

Suspension & running gear:

Eye to eye shackle suspension for our single axle trailers & rocker roller suspension for the tandem trailers with overlay axles fitted as a standard option. Using the overlay axle allows the trailer to ride lower to the ground for ease of loading your bikes, especially road bikes.

The 4x4 option uses the same suspension systems with a straight beam axle or now with the option of Independent trailing arm suspension with individual stub axles for those who are looking to do a bit more off road work.

Single axle eye to eye shackle suspension

Tandem axle rocker roller suspension

AL-KO independent trailing arm suspension

Positioned in front of PA door

Positioned behind PA door with removable double in place

Positioned in front of PA door

Positioned in behind PA door

Securing your load:

Unique to Motostar our tie down system for your bikes is removable, adjustable and can be positioned either behind the PA door for easy access to your trailer or in front depending on how many bikes you are travelling with.

This system means no wheel wells or lashing rings to obstruct the floor space when moving around in the trailer & camping.

5 - 6 BIKE PRO SERIES WEEKENDER

OVERALL LENGTH 6500mm

WIDTH (exc, awning) 2200mm
